I am a Full Stack developer with experience in JavaScript, React, Redux, HTML, and CSS. I am recognized for my commitment to continuous learning and constant improvement. I have worked on individual and group projects using agile methodologies such as SCRUM, enhancing skills in teamwork, effective communication, and problem-solving. I am looking to join an inspiring team to continue growing professionally.

PROJECTS

Full Stack Web Developer - DogsApi

[Repository Link](#)

(Jan 2024 - Feb2024)

Created a visual interface for DogsApi, integrating data from an external API and a database for accurate dog information. Implemented detailed dog cards with advanced filters, sorting, and search options for a personalized user experience. Enabled full CRUD operations for comprehensive data management. Utilized Express for backend routes, controllers, and handlers, with PostgreSQL ensuring efficient data persistence and scalability.

Full Stack Developer - CharlieApp

[Video-demo Link](#)

(Feb 2024 - March 2024)

Helped develop an application for bars, implementing advanced technologies to create key features and administrative dashboards.

Developed features for users to explore the bar menu and place orders via the app.

Designed QR code generation for orders to streamline customer-bartender interactions.

Implemented QR code scanning for bartenders to efficiently process orders.

Contributed to an admin dashboard for managing stock and employee accounts.

Improved information flow between Redux components using QR codes.

Enhanced navigation and user experience by creating and styling user-friendly components.

Front End Developer - Gym App

[Repository Link](#)

(May 2024 - Present)

Currently developing a gym enthusiast app that streams gym content and facilitates direct interaction with personal trainers. As the front-end developer, I design and implement user-friendly interfaces, create responsive layouts, and utilize modern frameworks like React, CSS3, and Material UI for dynamic features. I collaborate with the back-end team for smooth data flow and continuously test and optimize the app for performance and usability.
